HOLLER UNCLASSIFIED UNCLASSIFIED 324 III. THE EVOLUTION OF THE SONOBUOY World War II On 3 September 1939, England and France declared war on Germany, and the Battle of the Atlantic officially began.

THE EVOLUTION OF THE SONOBUOY FROM WORLD WAR II TO THE

A semiconductor material has an electrical conductivity value falling between that of a metal, like copper, gold, etc. and an insulator, such as glass. Their resistance decreases as their temperature increases, which is behaviour opposite to that of a metal. Their conducting properties may be altered in useful ways by the deliberate, controlled introduction of impurities ("doping") into the ...

Passive sonar listens without transmitting. It is often employed in military settings, although it is also used in science applications, e.g., detecting fish for presence/absence studies in various aquatic environments - see also passive acoustics and passive radar. In the very broadest usage, this term can encompass virtually any analytical technique involving remotely generated sound, though ...
