The Department designs and implements the Australian Government's policies and programmes to protect and conserve the environment, water and heritage and promote climate action

**Home - Department of the Environment and Energy**

Overview. The Department of Energy (DOE) is a cabinet-level agency that has both important energy- and national security-related missions. DOE's roots go all the way back to World War II and the Manhattan Project, the top-secret program that launched America's effort to develop and stockpile nuclear weapons.

Renewable energy is energy that is collected from renewable resources, which are naturally replenished on a human timescale, such as sunlight, wind, rain, tides, waves, and geothermal heat. Renewable energy often provides energy in four important areas: electricity generation, air and water heating/cooling, transportation, and rural (off-grid) energy services.

World energy consumption is the total energy used by the entire human civilization. Typically measured per year, it involves all energy harnessed from every energy source applied towards humanity's endeavours across every single industrial and technological sector, across every country. It does not include energy from food, and the extent to which direct biomass burning has been accounted for ...

Hydraulic fracturing and horizontal drilling are safely unlocking vast U.S. reserves of oil and natural gas found in shale and other tight-rock formations. Developing energy from shale is an advanced process that uses the latest drilling technologies and equipment. As for what fracking means to the United States – the answers are security, economic growth and jobs, jobs, jobs.
