The urine anion gap is calculated using measured ions found in the urine. It is used to aid in the differential diagnosis of metabolic acidosis.. The term "anion gap" without qualification usually implies serum anion gap. The "urine anion gap" is a different measure, principally used to determine whether the kidneys are capable of appropriately acidifying urine.

Having lived through both World Wars, Jung was aware of the dangers of what he termed "psychic epidemics." He discussed the spontaneous manifestation of an archetype within collective life as indicative of a critical time during which there is a serious risk of a destructive psychic epidemic. Currently, we appear to be experiencing a significant psychic epidemic that is manifesting as ...
