An ecosystem is a community of living organisms in conjunction with the nonliving components of their environment, interacting as a system. These biotic and abiotic components are linked together through nutrient cycles and energy flows. Energy enters the system through photosynthesis and is incorporated into plant tissue. By feeding on plants and on one-another, animals play an important role ...

Environmental Awareness - Naturalist Intelligence Environment is the area in which we live and share. The thin layer of air that surrounds our planet that supports life. Humans are the only kind of life that we know of that exists in our universe. If we did not have our environment we could not exist.

Water vapor feedback is way more complicated than most people think. It is only partly understood and a dynamic process. Like most, if not all natural processes or dynamic systems, they are always tending or trending to some kind of equilibrium; however, that equilibrium is a continually moving target.

Five Reasons Why Water Vapor Feedback Might Not Be
