The majority of US youth are of healthy weight, but the majority of US adults are overweight or obese. Therefore, a major health challenge for most American children and adolescents is obesity prevention today, and as they age into adulthood. In this report, we review the most recent evidence regarding many behavioral and practice interventions related to childhood obesity, and we present ...

Development of memory in childhood. Childhood memories have several unique qualities. The experimental psychologist and cognitive neuroscientist Endel Tulving refers to memory as "mental time travel", a process unique to humans. However, early memories are notoriously sparse from the perspective of an adult trying to recall his or her childhood in depth.
